Tuning

Pegs: Used for making larger adjustments in sound (if the instrument is really out of tune)

Fine Tuners: Used for making smaller adjustments in sound (if the instrument is slightly out of tune)

When using the pegs, always turn the peg **DOWN** to **LOOSEN** it (go flat in sound) before tightening it (go sharp in sound). Turn a little at a time so the string does not snap.

Playing with a Good Tone (Sound)

Use a faster bow speed
Good contact of bow hair on the string
